We want your feedback on the Government's proposed Three Waters Reform, including whether we should opt-in or opt-out, based on the information we have available to date.

Most importantly, we're keen to know the reasons for your decision. This is so that we have a very clear understanding of your views when we give our feedback to the Government.

Option 1 – Opt in

I think the Council should opt-in to the Government's proposed Three Waters Reform.

Please tell us why you chose this option:

- I believe that we should be providing the same level of service for three waters across all of New Zealand
- I feel that I will get better value for money by merging 67 councils into four large entities
- I can see advantages of combining three waters assets into four large entities
- It will improve efficiencies across three waters services
- I think the new three waters entity will be better able to keep up with increased regulations and requirements
- Other - please state.

Option 2 – Opt-out

I think the Council should opt-out of the Government's proposed Three Waters Reform.

Please tell us why you chose this option:

- I'm concerned we won't have a strong democratic say in the way three waters services are provided
- I want our three waters services to be managed, built and operated locally, by people who understand our area
- I'm worried our water rates will end up funding upgrades in other areas
- I don't think it will improve efficiencies
- I think we should hold off on any decisions and consider this alongside the wider future for Local Government Review and Resource Management Act (RMA) reform
- Other - please state.

Option 3 – Undecided

Comments:

Prefer to keep these situations in local area by local people.

Past amalgamations show that this does not lead to reduced costs, usually the reverse. The assets involved are too valuable to "give away", and no doubt the council relies on these to backup borrowing.

At a time of such economic uncertainty in the world, families are struggling financially. Living cost are rising and wages are not matching the increase, making it a struggle for a lot of people. there is a lot of household that will not be able to survive with the cost this will put on them.

This also feels very rushed and there hasn't been enough information from the government for the people to make a educated decision.

Option 1 - Council should opt IN

Please tell us why you think Council should opt IN

I believe that we should be providing the same level of service for three waters across all of New Zealand

I feel that I will get better value for money by merging 67 councils into four large entities

I can see advantages of combining three waters assets into four large entities

It will improve efficiencies across three waters services

I think the new three waters entity will be better able to keep up with increased regulations and requirements

Other

Please tell us why you think Council should opt OUT

Please comment on why you chose Option 3 (Undecided)

Other - please state

Council's future cost estimates are grossly under budgeted considering future increases in cost and cost of likely government required environmental improvements. Council has a track record of underestimating the cost of projects and then dumping the extra cost on ratepayers by stealth. The central government has been generous with helping in the past but expect this to end if the ill advised go at it alone stance is adopted.

? Power boats allowed on the town's drinking water supply(s)? In present times most civilized societies would never allow this because of the contamination from various petrol chemicals (oil, fuel, etc.) used by these. Are these products regularly tested for in the drinking water? Many places even fully fence out animals and do not allow any human activity on their drinking water supply lakes.

The past and present treatment of sewage waste in Westland is a disgrace. For many years most places that care about their environment use a Tertiary Waste Water Treatment System. What is allowed to go into the sea in Westland is gross.

'The solution to pollution is dilution' and 'out of site out of mind' don't work for the common good.

Assets...I don't care who owns it, but do care that they take care of it properly and in an environmentally sustainable manner.

Option 2 - Council should opt OUT

Please tell us why you think Council should opt IN

Please tell us why you think Council should opt OUT

I'm concerned we won't have a strong democratic say in the way three waters services are provided
I want our three waters services to be managed, built and operated locally, by people who understand our area
I'm worried our water rates will end up funding upgrades in other areas
I don't think it will improve efficiencies
I think we should hold off on any decisions and consider this alongside the wider future for Local Government Review and Resource Management Act (RMA) reform
Other

This is the first step on a programme to hand ownership of the water to Maori. No body owns water, only the infrastructure. We do not want to become like other parts of the world where water is a commodity and is traded and big companies make a lot of money trading water. So why should rate

paying kiwis have to pay big money to a corporate for water that falls form the sky for free in this country.

Option 3 - I am undecided

Please tell us why you think Council should opt IN

Please tell us why you think Council should opt OUT

Please comment on why you chose Option 3 (Undecided)

I believe the Council should be realistic about WDC's inability to fund the required long term work from WDC rates alone.

I feel that I may get better value for money by merging 67 councils into four large entities

I can see advantages of combining three waters assets into four large entities

It may improve efficiencies across three waters services

I think the new three waters entity may be better placed to enable the funding of services required in the WDC area.
