laurens foulger

Address

4082 harihari highway

Option 1 - Opt-in

Please tell us why you chose this option

Other - please state

Option 2 - Opt out

I think the Council should opt-out of the Government's proposed Three Waters Reform.

Please tell us why you chose this option

I'm concerned we won't have a strong democratic say in the way three waters services are provided
I want our three waters services to be managed, built and operated locally, by people who understand our area
I'm worried our water rates will end up funding upgrades in other areas
I don't think it will improve efficiencies
Other

Other - Please state

1st of all no one owns the water in any shape or form
2nd small suppliers under 50 or so should be left out
3e national government doesn't have a clue what they are doing let alone manage our supply of water.
The west coast hardly even gets a weather update on national tv let alone some in a national outfit remembering to upgrade our water lines.

Option 3 - Undecided

Message

Attn Bruce

Hi there,

I just wanted to say that as ratepayer and taxpayer I do NOT consent to my rates or taxes being used to implement any goals of the UN or WHO, or any other international agency.

It's not acceptable to me that goals of such agencies should be imposed without full consultation and agreement with local communities.

Thank you for sharing your concerns about the 3 waters initiative - I appreciate you questioning whether it is in our interests (pretty clearly it is not). Please continue to stand strong and speak your truth on this and other things being imposed on us

Thanks

from Merryn

Other - Please state

When the Education Board, back in the 80's ran the schools on the West Coast from Canterbury, we were known as the 'poor' schools with lack of funding for repairs and maintenance. Look at the Intermediate School in Greymouth that had to be closed because of the state it was in. The same thing would happen to the West Coast Water situations. Small population, large, long area of land and not enough money to supply great water systems to our towns, as no doubt, funding will be based on population.

I think that along with the SNA land grab, it is just another way of removing us from control of our own assets.

I do not believe that it will be cheaper

I strongly object to the propaganda advertising campaign that is happening at the moment.

Other

Other - Please state

This is a clear strategy to have centralised control. I do think the local systems could be managed better - the Hokitika Settling/oxidation ponds are an eyesore and the discharge is a disgrace - but to fix that you don't need centralised control.

In respect to potable water (I am a rural ratepayer and provide my own) there are other solutions that Government might come up with will be complex, expensive and lacking in local considerations.

I am of the opinion that as a country we need urgently to upgrade our entire water systems from the hills to the sea and from catchment to tap but I do not feel as though we should be lumped in with the North Island as we are a unique environment and requires unique solutions .

Other - Please state

Once locals lose control of assets they are often miss treated and the cost increases whilst the service stays the same or gets worse. Having these assets in multiple hands means different methods can be trialled without having to go to a committee that has other vested interests, this has been demonstrated in the north Island. Big Governments only want these assets for power, control and the ability to raise money which they continue to abuse.

As this whole process is being rushed upon us, council/rate payers

I strongly feel we should step back and fully assess what is being put forward by central government

I personally am worried this is just another Kiwi rail debacle

where by our assets are sold off cheap and the new owner will just run them into the ground and do little maintenance. Once the horse has been flogged to death the tax payer will again pick up the tab.

Where is their so called proof of mass failure ?

I am happy with the efforts of our current council and would prefer the status quo

Option 1 - Opt-in

Please tell us why you chose this option

Other - please state

Option 2 - Opt out

I think the Council should opt-out of the Government's proposed Three Waters Reform.

Please tell us why you chose this option

I'm concerned we won't have a strong democratic say in the way three waters services are provided

I want our three waters services to be managed, built and operated locally, by people who understand our area

I'm worried our water rates will end up funding upgrades in other areas

I don't think it will improve efficiencies

Other - Please state

Option 3 - Undecided

Option 3 - Undecided

Always remember centralized control is always in the power of parties with their own agenda and with the enrichment of themselves and their backers not the rate paying population. Special interest groups, are only interested in themselves not the population as a whole

Other

Other - Please state

Each region in the country is different and has different needs. The West Coast is very spread out and has a small population. We believe that its own existing local Council know how best to provide such essential services. We don't believe that its assets and ratepayers would benefit in any way by being swallowed up by a large entity. We believe that that would inevitably mean inefficiencies and very high on-going unaffordable annual costs to each ratepayer. What is the Government's rush in all of this? It is far too big a decision to be rushed and we agree with our mayor's proposal that there should be a BINDING referendum carried out on the topic.

Comments I don't currently pay a water rate but was a councillor for 21 years and know our council was ahead of most others in regards to our 3 waters

I haven't forgotten what happened when the power reforms were forced on us and we have been screwed ever since
